User Manual
Mobile Application for Change Detection & Monitoring

Developed by **SkyMap Global Private Limited**

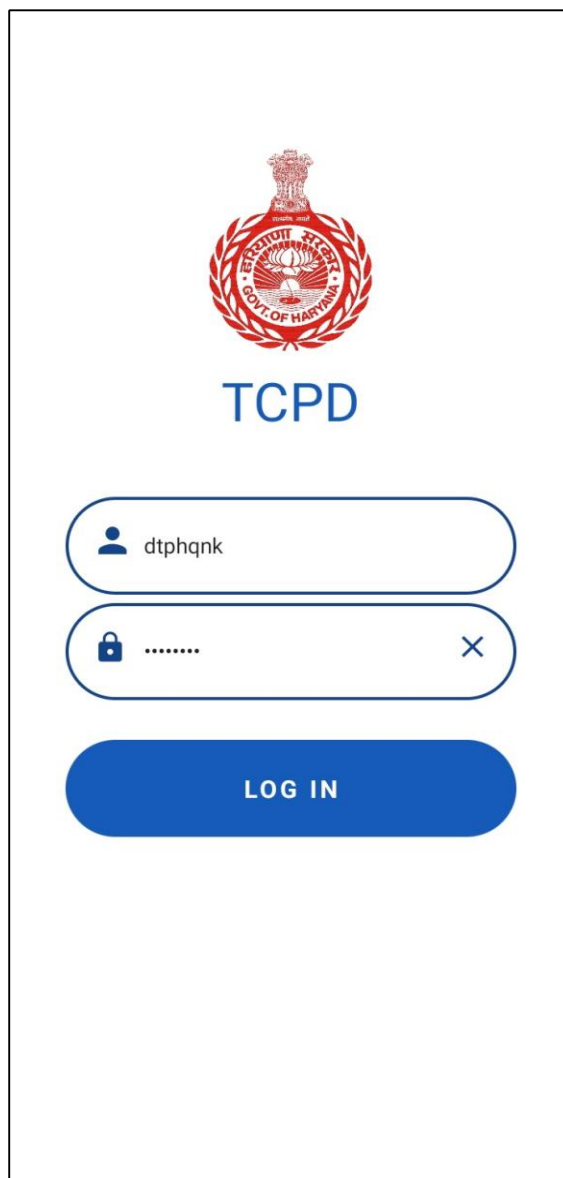

Background:

Accurate Change detection, monitoring system and correct Enforcement using high resolution imagery is a prerequisite in understanding the true urban growth development process. In this scenario, Geospatial technology plays a critical role in providing spatial information that is helpful for change detection and monitoring for different activities. The technology is able to provide insight information about the land, cultivated areas, and agriculture land, built up structures. Therefore a Geo-tagging mobile Application is developed to verify the actual situation from the information provided by the web portal, and to enforce necessary steps which need to be taken.

SkyMap has designed, build, and delivered a customized user-friendly web-enabled GIS based Change Detection application platform and mobile app system. The purpose of the system is to view and manage 2D (area) and 3D (height) change detection of urban construction activities in the areas of interest using high resolution Satellite imagery; it will provide storage, access, and visualization of legacy and future data, including analysis result, illegal building notices and building status etc.

Mobile Application

Getting Started :-

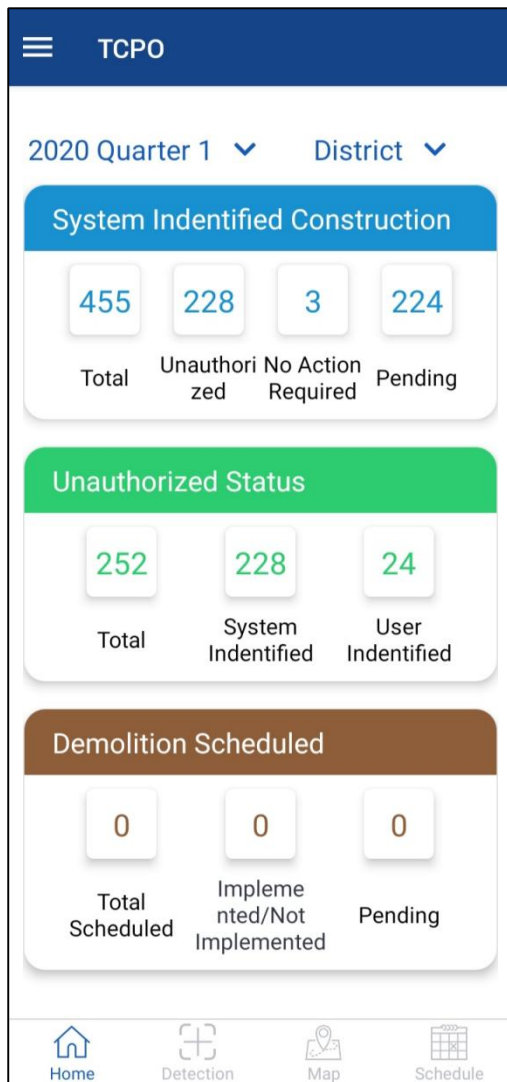

Login Page – Username & Password

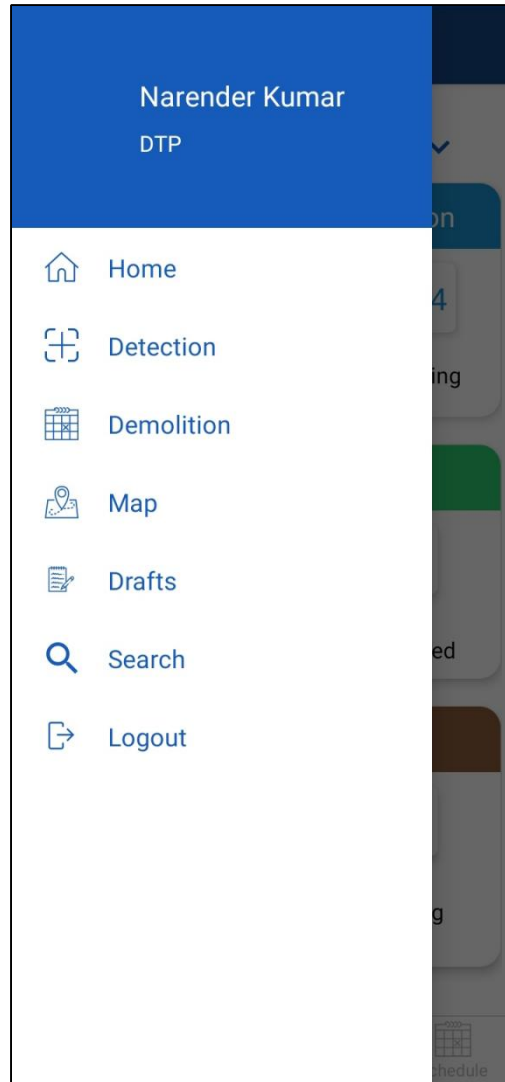

Login to TCPD/DTCP Mobile App with registered Enforcement/SSO Username and Password.

Login is based on AOI for:-

- *JE/DTP login can see his district*
- *STP login can see his circle districts*
- *DTCP & CTP login for entire districts*

Home Page

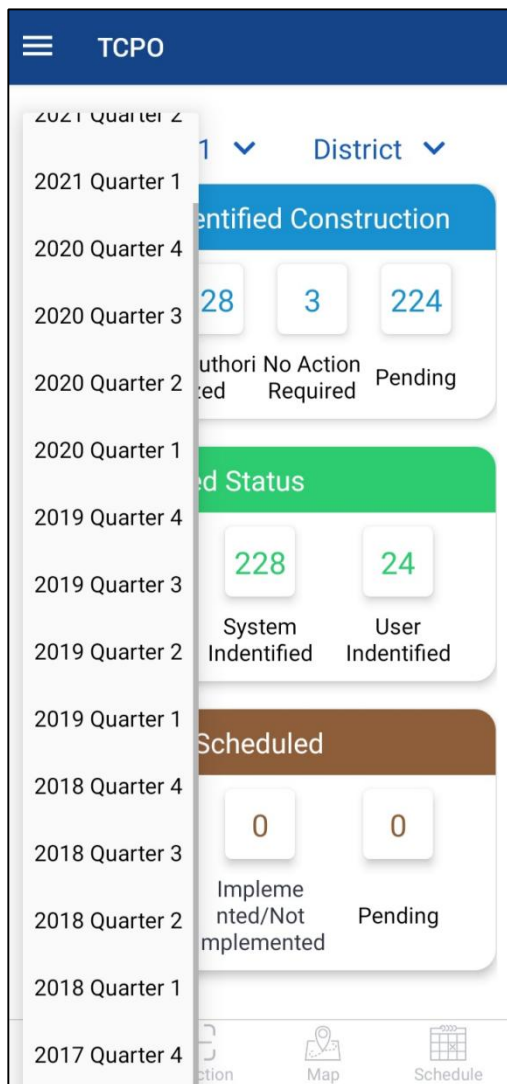

Home Page – Sidebar Menu

Sidebar menu shows the same navigation as the Bottom Navigation Bar:

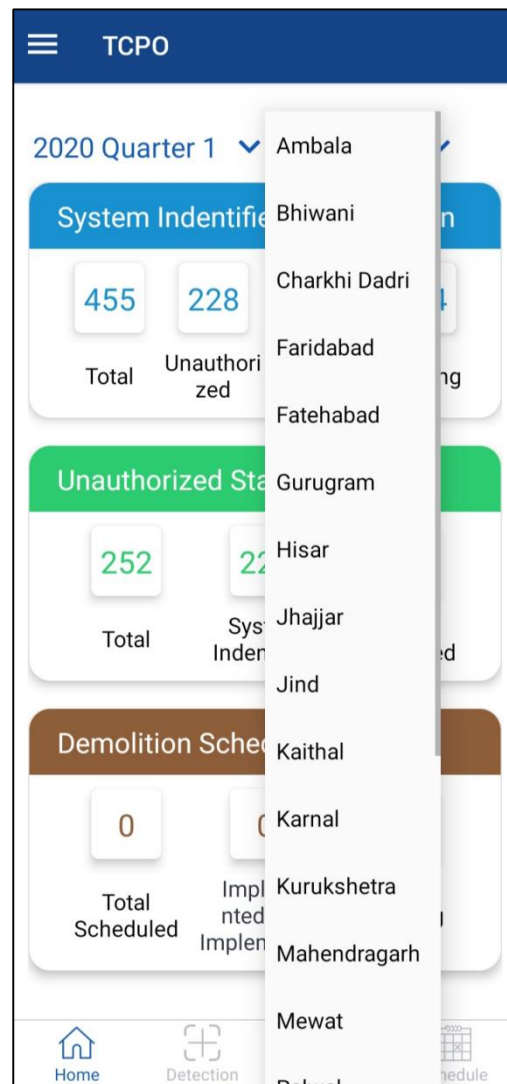

- ☐ Add Detection Report
- ☐ Demolition Schedule
- ☐ Change Detection Map
- ☐ Saved Drafts.

User can also log out of User account in Sidebar Menu by clicking on the Log Out button.

User can also Search in Sidebar Menu by clicking on the Search option.

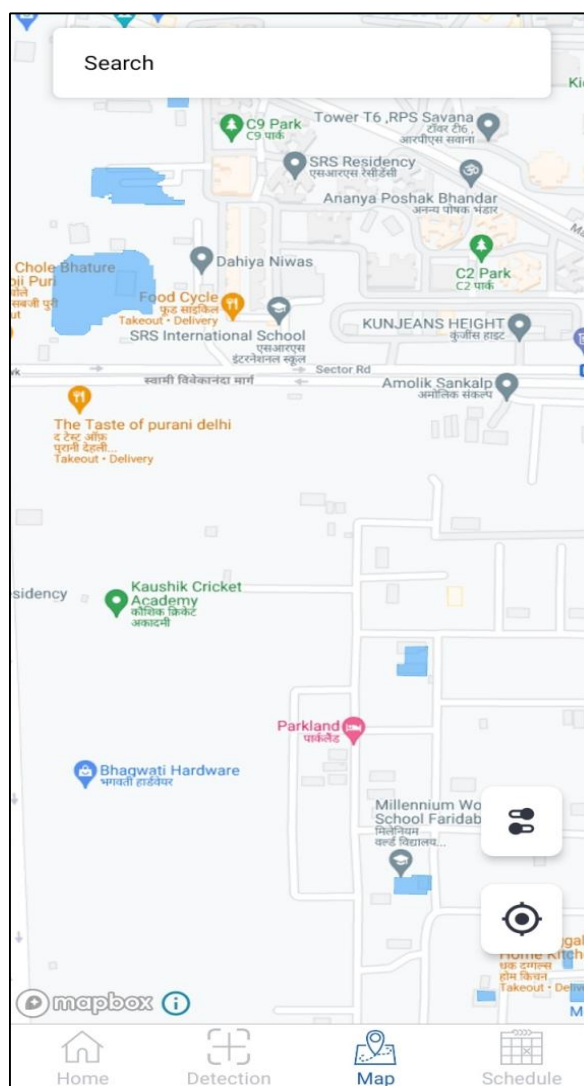

Home Page – Select Time Period

Home Page – Select District

User can see the brief overview of the recent activities according to the selected time period; user can select the time period and District from dropdown. Additional info will also be shown when user clicks a specific group(eg: Unauthorized enforcement report).

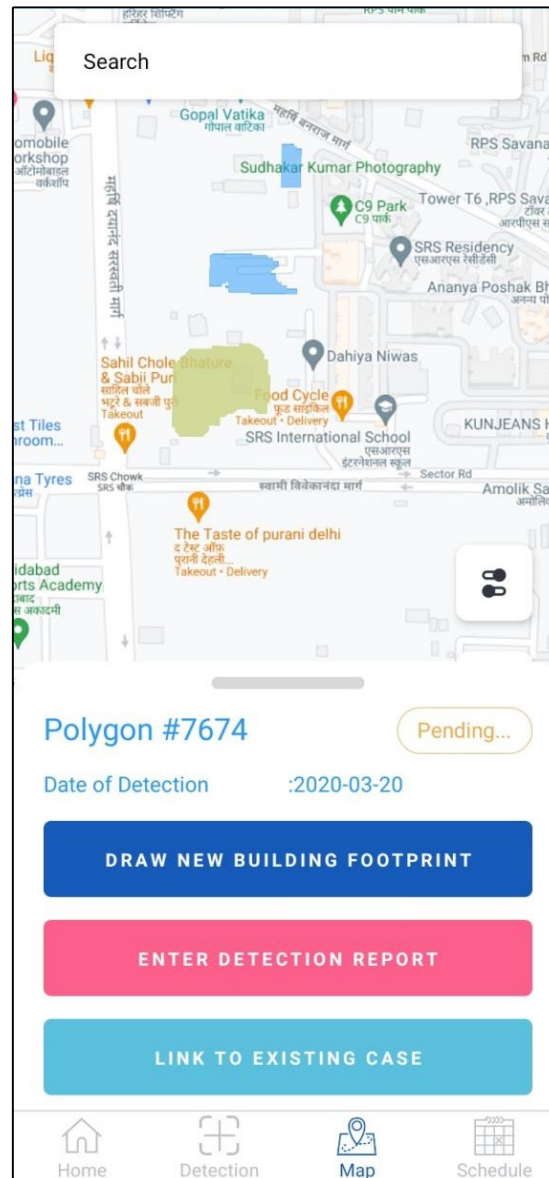

Change Detection Map - Explore Map

User can see User position on the map along with latest change detections nearby.

The map will also highlight an area within 10m radius from User location, this radius can be adjusted by clicking on the settings icon.

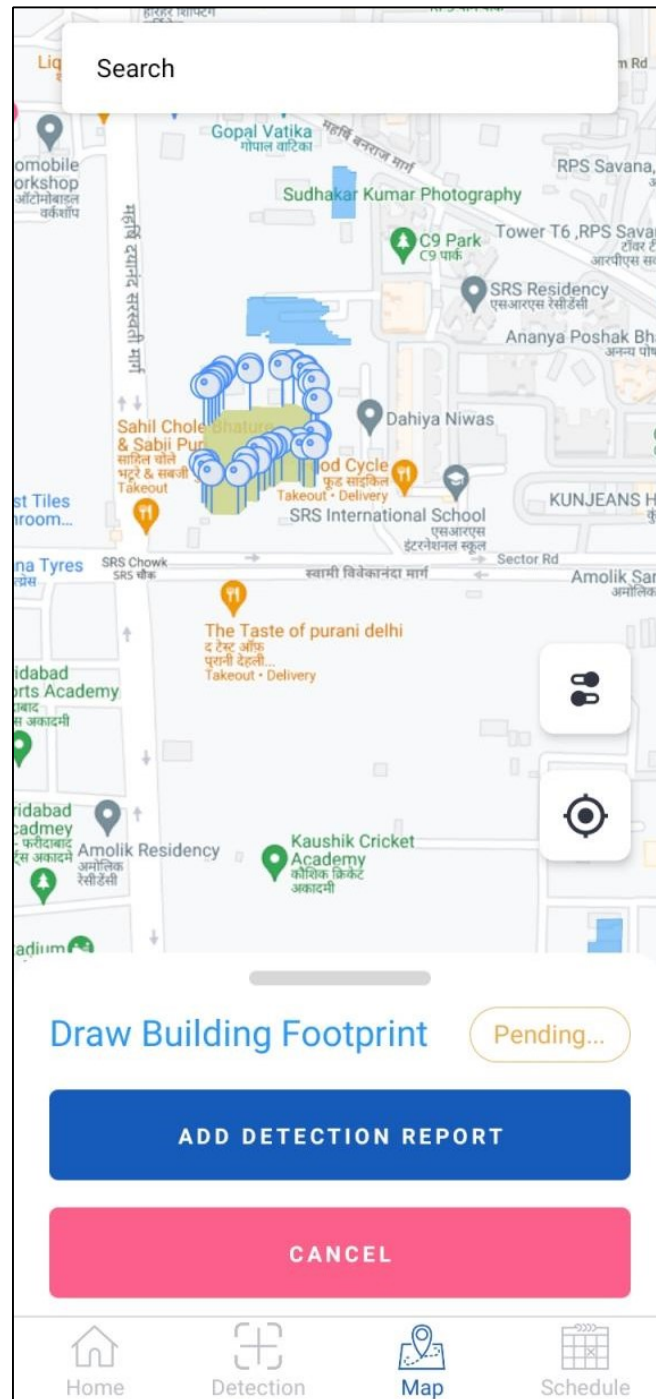

- In case the detection detail is already available in the DB, the application will take the user straight away to the Demolition screen
- In case, the detection detail is not available in the DB, the mobile app will take user straight away to the detection screen.
- For unauthorized constructions (including colonies) identified in the quarterly report, if the data already exist in the Enforcement desktop app of the department, there will be a provision to create a polygon in mobile app and link the existing enforcement-id with that polygon.
- For constructions that are not identified in the quarterly report, give option to user to add new polygon > user will be able to create a polygon on map and add detection details / link enforcement file id with the polygon

Change Detection Map - Select Polygon

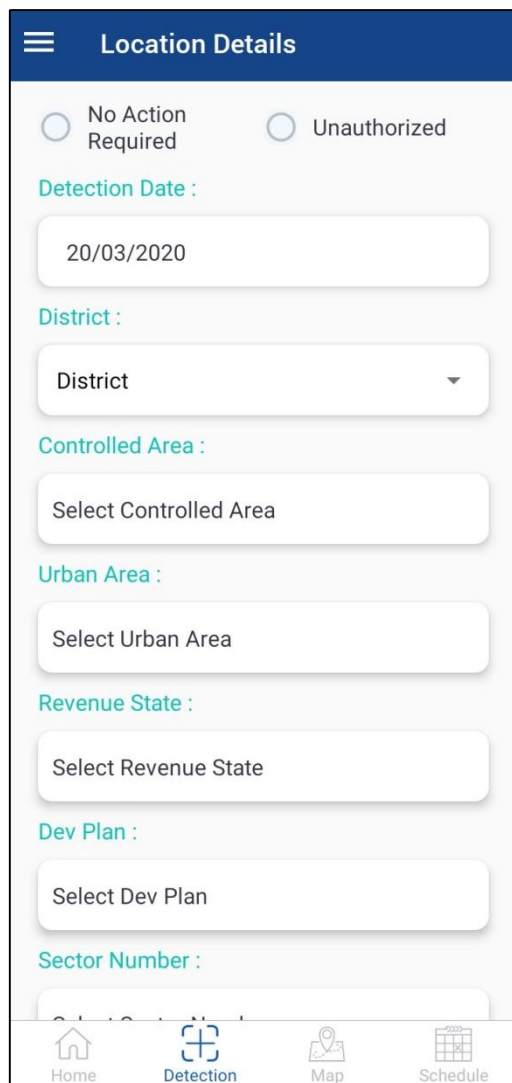

User can select a change detection polygon and view the status of the change detection polygon.

User can then add new building footprint by clicking on 'Draw New Building Footprint'; the building footprint will be initialized by the selected change detection polygon, but User will be able to adjust the polygon

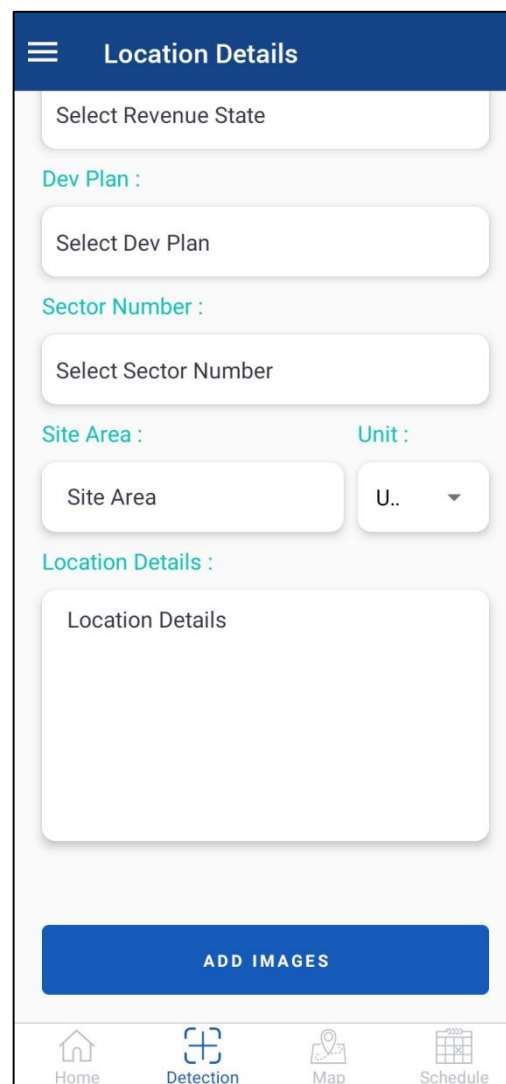

Detection – Adjust Building footprint

User can draw/adjust the building footprint for the detection report. Click 'Add Detection Report' to proceed to the Detection Report form.

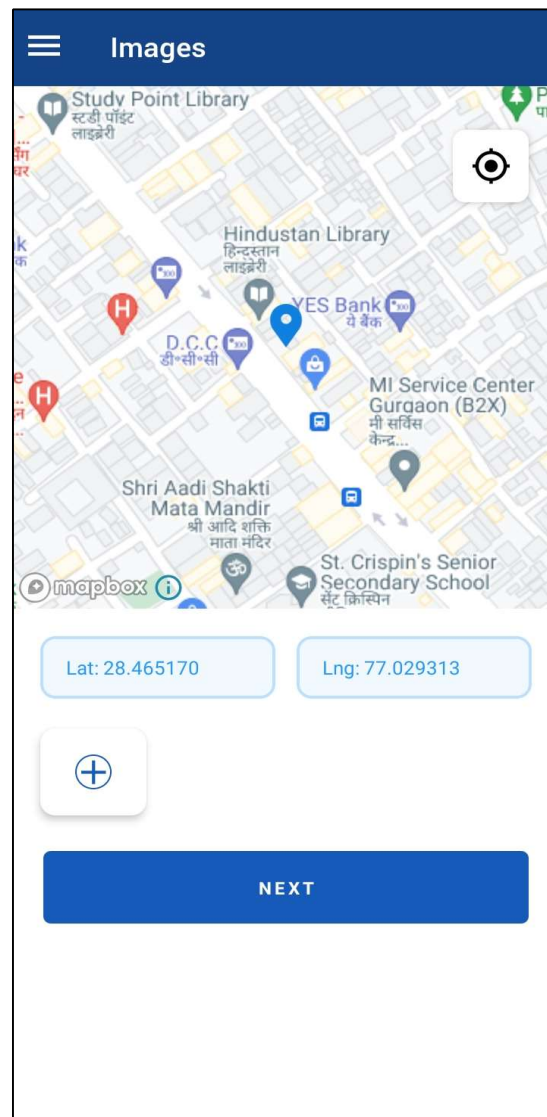

Detection – Add Site Information

Detection – Extended Site Information

This is the first page of Detection Report form. User can fill in Site Information of the detected building.

- Select type of site: Construction/Colony.
- Select status of site: No Action Required / Unauthorized.
- If User have previously drawn a building footprint, the District Id, Controlled Area, Urban Area Id, and Area will be pre-filled based on the Building Footprint drawn but User can manually adjust it if User needs to.
- Click 'Next' to proceed.

Detection Report - Coordinate and Images

- ☐ Coordinate will be pre-filled based on User GPS location but User can adjust it if needed.
- ☐ User can also add related photograph for the detection report.
- ☐ Photograph is not optional for Authorized Building. Click 'Next' to proceed.

Detection – Capture Images

Capture Photograph; Click the 'Cross' icon to cancel, click 'Camera' icon to capture, click 'Check' icon to confirm image. For authorized building Image Capture is not compulsory. But for Un-Authorized and Demolition Image Capture is compulsory.

Detection – Authorized Category Options

Add additional information regarding the detected authorized building. User will have the information with him/her regarding the details of authorized building. We will rename or delete the “Permission Order Date” if required by the department.

The screenshot shows a mobile application interface for 'Authorized Info'. It includes a header with a menu icon and the title 'Authorized Info'. Below the header, there are three input fields: 'Category' with a dropdown arrow, 'Permission Order Date' with the value '25/08/2021', and 'Remarks'. A blue success message box is displayed in the center, stating 'Successful! You successfully submitted Authorized Information Form.' with a 'HOME' button. At the bottom, there is a dark blue 'SUBMIT' button.

Detection – Submit Detection Report for Authorized building

- ☐ User successfully submitted the Authorized Detection Form.
- ☐ For Authorized Buildings detail will be stored in the Change Detection Database.

Note: The Enforcement file id will be created only in case the construction is identified as unauthorized after field updation by the staff.

UPDATE

Demolition – Updation of Demolition Status

Update the information that needs to be updated and optionally add images related to the demolition. Click 'Update' to save the changes.

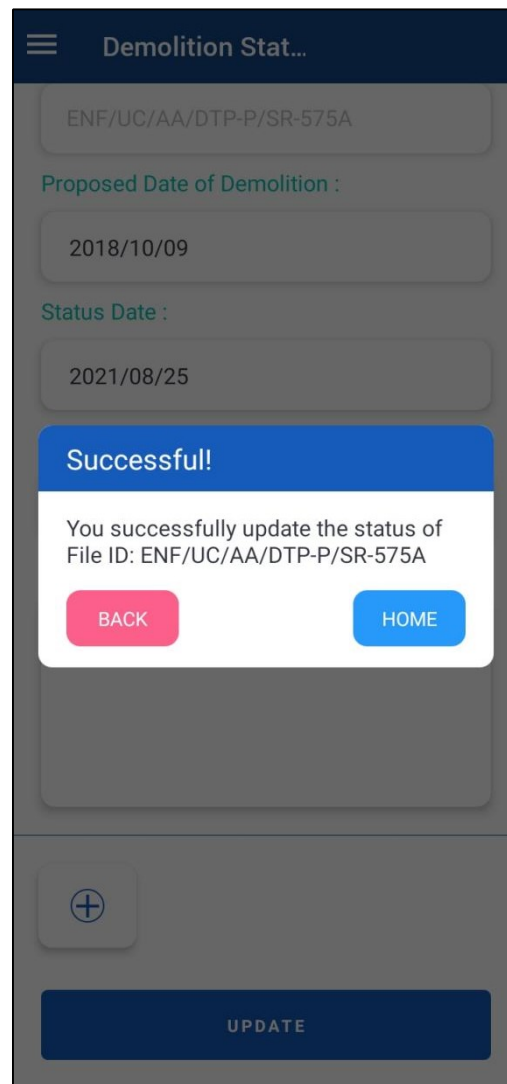

Demolition – ADD Geo-tagged Photograph

Demolition – Capture Geo-tagged Photograph

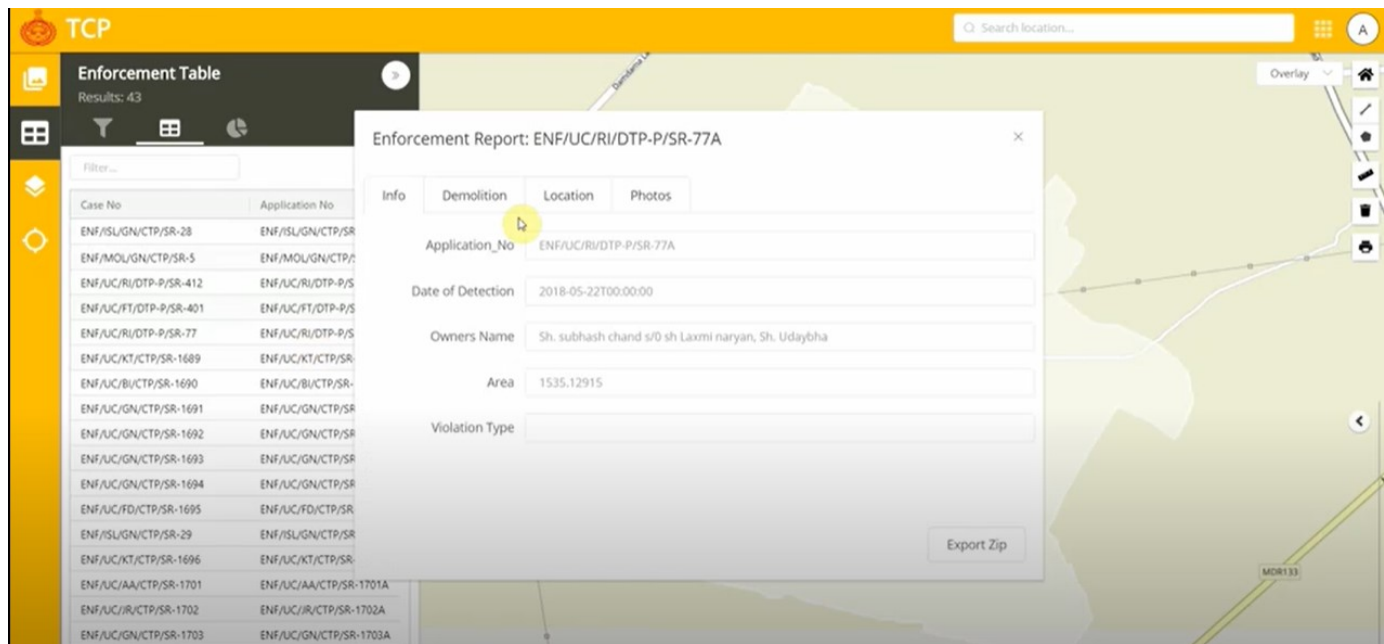

It is compulsory to add photos by the Mobile User.

The screenshot displays a mobile application interface for 'Demolition Stat...'. At the top, a dark blue header bar contains a hamburger menu icon and the title. Below the header, the form fields are visible: a text input for 'ENF/UC/AA/DTP-P/SR-575A', a 'Proposed Date of Demolition' field with the value '2018/10/09', and a 'Status Date' field with the value '2021/08/25'. A prominent blue success message box is centered on the screen, stating 'Successful!' and 'You successfully update the status of File ID: ENF/UC/AA/DTP-P/SR-575A'. Below this message are two buttons: a pink 'BACK' button and a blue 'HOME' button. At the bottom of the screen, there is a dark blue 'UPDATE' button and a grey button with a plus sign icon.

Demolition – Submission of Demolition Status

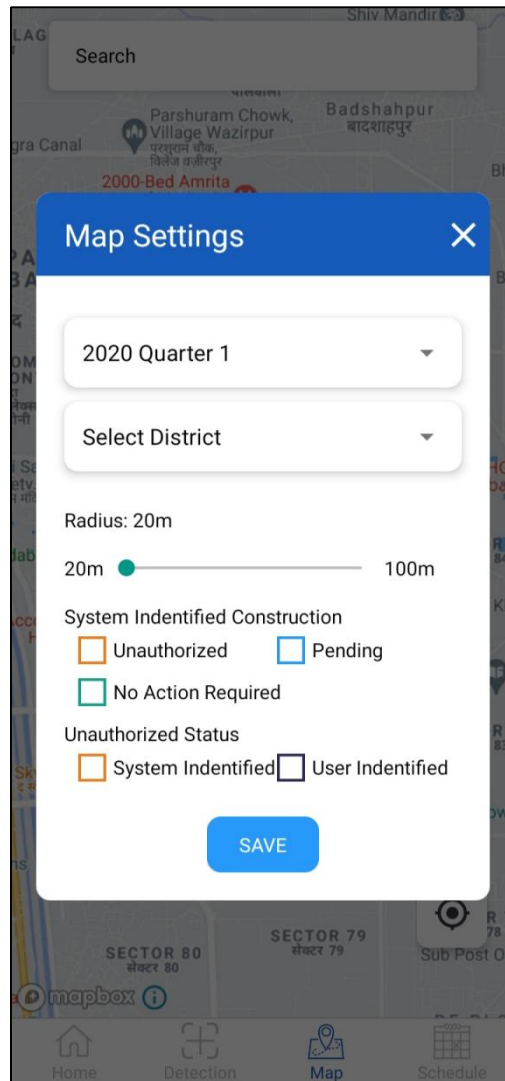

User successfully updated the Demolition Update Form!

The screenshot displays the TCP (Traffic Control Panel) interface. On the left, the 'Enforcement Table' shows a list of 43 results. The table has two columns: 'Case No' and 'Application No'. The main area shows a detailed 'Enforcement Report' for the case 'ENF/UC/RI/DTP-P/SR-77A'. The report includes fields for 'Application_No', 'Date of Detection', 'Owners Name', 'Area', and 'Violation Type'. The 'Date of Detection' is '2018-05-22T00:00:00'. The 'Owners Name' is 'Sh. subhash chand s/o sh Laxmi naryan, Sh. Udaybha'. The 'Area' is '1535.12915'. The 'Violation Type' is empty. There is an 'Export Zip' button at the bottom right of the report.
